Education

Ananthalakshmi Institute of Technology and Sciences

Anantapur, India

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Expected 2029

- **B.Tech CGPA:** 8.0/10

- **Relevant Coursework:** Data Structures, Analysis of Algorithms, Object-Oriented Programming, Database Management Systems

Prior Education:

- Intermediate (MPC): 60%
- 10th Grade: 9.7 CGPA

Technical Skills

Programming Languages: Object-Oriented Programming, C++, Java, Python, SQL

Core Computer Science: Data Structures and Algorithms (DSA), System Design, Operating Systems, SDLC

Software Development & QA: Agile Methodologies, Automation, Functional Testing, Defect Tracking

Tools & Cloud Infrastructure: Git, GitHub, VS Code, Cloud Run, Google Kubernetes Engine, Microsoft Excel

Experience

College Coding Club & Institutional Quantum Club

Anantapur, India

Technical Student Coordinator

Nov 2025 – Present

- Coordinated operational schedules and delivery timelines for a fast-growing campus community of over **100+ active student members**[cite: 1].
- Applied structured engineering principles to audit and validate over **30+ technical open-source resources**, improving processing accuracy and documentation standards.
- Collaborated with cross-functional student panels to eliminate technical onboarding bottlenecks, **reducing initial setup friction by 25%** and streamlining multi-team event delivery[cite: 1].

Projects

Student Management System (Java & OOP)

- Engineered an object-oriented Java application utilizing strong encapsulation and robust exception handling to execute CRUD operations on student records following standard SDLC principles[cite: 1].
- Implemented custom data structures to enhance search efficiency and data retrieval accuracy within a modular code structure.

Database Management Project (SQL)

- Designed structured relational database schemas and wrote optimized SQL queries using normalization boundaries to guarantee strict data integrity[cite: 1].
- Programmed grouped analytical reports to analyze data performance and verify query efficiency under variable constraints[cite: 1].

Data Quality Automation Framework (Excel)

- Developed a verification framework utilizing conditional logic, VLOOKUP, and XML data boundaries to isolate duplicate, missing, or inconsistent records[cite: 1].
- Automated reporting criteria to systematically highlight processing anomalies, optimizing overall data observability.

Certifications

- Google Cloud Infrastructure Training (Cloud Run & Google Kubernetes Engine)
- IBM Foundations of AI & AWS Introduction to Cloud Computing[cite: 1]
- Google Machine Learning Fundamentals & Cisco Networking Academy Training[cite: 1]

Extra-Curricular Activities

- Active Core Member of the Innovation Hub and college Quantum Club, directing collaborative software development initiatives[cite: 1].
- Participated in intense collaborative rapid development sprints, team code reviews, and structured problem-solving challenges[cite: 1].
